Patient Name: ALAN FORSTATER

Visit Id: SANDIEGO001

Medical Record: CMREDIS01

Sex: Male

Date of Birth: 12/11/1953

Race: Caucasian

Arrival Date: 12/08/2008

Arrival Time: 09:17:00

Age: 54yo

Assumption of Care

Date/Time	Physician	Commentary
12/08 10:00	Robert Tassin, MD	

Chief Complaint(s)

Triage Complaints are Weakness; Abdominal Pain .

History of Present Illness (HPI)

The quality is acute. The severity is moderate. The duration is for 3 day(s). D/C'ed from admit for AGE 3 days ago. Now weaker and no appetite. Now constipated. During recent admit he had bloody diarrhea. Continues after over-the-counter (OTC) medication(s).

Past Medical, Family, and Social History (PFSH)

Medical history positive for HTN; positive for diabetes insulin dependent. "Irregular Heart beat". Surgical history Cholecystectomy; Appendectomy.

Review of Systems (ROS)

Constitutional: Admits to: fever and weakness.
Eyes: Admits to: blurred vision.
Cardiovascular: Admits to: dyspnea on exertion and Denies: chest pain.
Respiratory: Admits to: shortness of breath and Denies: cough.
Gastrointestinal: Admits to: constipation and nausea.
Genitourinary: Decreased output.

All other systems reviewed and were negative.

Physical Exam (PE)

Constitutional: No apparent distress; awake, alert, and oriented as to person, place, and time (AAOx3).
Eyes: Pupils are equal and react to light (PERL); eyes exhibit full range of motion (FROM); sclerae are clear.
ENT: Normocephalic and atraumatic; tympanic membrane(s) (TM) are normal; mouth exhibits no significant abnormality; full range of motion (FROM) in the neck; supple neck. Decreased mucous membrane moisture.
Cardiovascular: No gallops; no murmur; regular rate; irregular rhythm; capillary refill time (CRT) is greater than (>) two (2) seconds.
 Unlabored respiration; no rales; no rhonchi; no wheezing; lungs clear to auscultation bilaterally.

ALAN FORSTATER 54yo Male

Med Rec #: CMREDIS01 Visit #: SANDIEGO001

DOS: 12/08/2008
09:17:00

Gastrointestinal: Distended; tenderness in all quadrants of the abdomen; abnormal bowel sounds. Lap. surgical scars noted.

Genitourinary: Scrotal exam shows no significant abnormality.

Musculoskeletal: Generally normal and intact; extremities exhibit full range of motion (FROM); neurovascular intact. No Homan's. .

Skin: Skin is cool; mucous membranes are pale; diaphoresis.

Neurological: Cranial Nerves II-XII are intact; no focal weakness noted; mental status is appropriate for age, gender, and situation; moves all extremities without difficulty and are equal bilaterally; no sensory deficits; awake, alert, and oriented as to person, place, and time (AAOx3).

Date of Birth: 12/11/1953 **Race:** Caucasian
Arrival Date: 12/08/2008 **Arrival Time:** 09:17:00 **Age:** 54yo

Triage Nurse

Triage nurse is yrichard; triage start date/time is 12/08/2008 10:08; arrived via a wheelchair; transported by private transportation; accompanied by wife.

Chief Complaint(s)

Triage Complaints are Weakness; Abdominal Pain.

History of Present Illness (HPI)

Complains of Abdominal Pain, weakness; acute; mild to moderate severity; for 3 day(s); admitted 3 days ago for gastroenteritis - d/cd yesterday.

Triage Assessment

Alert; moderate distress; uncomfortable. Patent airway. Normal breathing pattern. Dry skin; pink; warm. Awake, alert, and oriented as to person, place, and time (AAOx3). Calm; cooperative.

Triage Vital Signs

Triage Vitals	Temp	BP	Pulse	Respirations	SaO2	Pain	Height	Weight
12/08 10:11 yrichard	102 rectal	90/60 mm Hg	120 bpm	27 rpm	88%	4/10		

Allergies/Sensitivities

Penicillin (PCN) allergy.

Current Medications

Medication

Insulin regular ; 2 units; SubQ.
 White b/p pill.
 Heart rhythm pill. Stopped taking last month.
 Valium; PO; dose and frequency unknown.
 2 immodium ; PO. At d/c.

Past Medical / Surgical / Social History

Insulin dependent diabetes mellitus (IDDM); hypertension (HTN); appendectomy; cholecystectomy.

Triage Location, Acuity, Interventions

Triage acuity: 3 - Urgent.
